Avaya Flare® Experience

Easy-to-Use, One-Stop Collaboration

1. Your Mobile Business Deserves Enterprise-Grade Tools

Give mobile workers the tools for anywhere execution, and anytime access to contacts and information. Enterprise-wide, scalable unified communications help ensure you have the real-time collaboration applications needed to work from client offices, the airport, or when telecommuting.

2. Integration is Bliss

Close all the standalone application windows on your screen, and open just your Avaya Flare® Experience. Collaboration is part of your core communications and not a separate place to go.

3. Skip the Instructions: This is Easy

To start collaborating, drag and drop someone from your contacts fan into your spotlight. See the best way to connect: IM, email, video call, etc. Just click to change from voice to video, pop up a slide or white board, or add an expert. Start a parallel session by using another spotlight.
